EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with A. Jose' Cortina (Reg. #29,733) on November 4, 2004.

The application has been amended as follows:

In claim 1, line 5 insert "a" after "with".

In claim 12, line 3 delete "a" (first occurrence) and insert "said" therefore.

In claim 17, line 8 insert "requests" after "(I/O)".

In claim 17, line 9 insert "during recovery" after "devices".

In claim 21, line 11 delete "recovery" and insert "recovering" therefore.

In claim 21, line 11 delete "associating" and insert "associated" therefore.

Allowable Subject Matter

2. Claims 1 and 5-23 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Art Unit: 2113

With respect to claim 1, the Examiner asserts that the novelty of the claim, when read as a whole, is the process of “detecting an exception condition in a network, said detection being done with computer connected to the network, and having an operating system thereon programmed for detecting exception conditions, recovering only the adapters, FIDs and LUNs within the scope of the exception condition, and issuing I/O requests to adapters, FIDs and LUNs during recovery that are not within the scope of the exception condition.”

With respect to claim 12, the Examiner asserts that the novelty of the claim, when read as a whole, is the process of “detecting an exception condition in a hierarchical computer network, said detection being done with a computer connected to the network, and having an operating system thereon programmed for detecting exception conditions, recovering only the nodes within the scope of the exception condition, and issuing I/O requests to nodes during recovery that are not within the scope of the exception condition.”

With respect to claim 17, the Examiner asserts that the novelty of the claim, when read as a whole, is “an operating system resident on the computer programmed to detect exception conditions relating to adapters, LUNs or devices, to recover only the adapters, LUNs or devices within the scope of the exception condition, and to issue I/O requests to adapters, LUNs or devices during recovery that are not within the scope of the exception condition.”

With respect to claim 21, the Examiner asserts that the novelty of the claim, when read as a whole, is the process of “detecting an exception condition in a network, said detection being

Art Unit: 2113

done with a computer connected to the network, and having an operating system thereon programmed for detecting exception conditions, recovering the FIDs or LUNs within the scope of the exception condition, said recovering being conducted by, 1) if an adapter needs to be recovered, recovering the adapter before recovering FIDs or LUNs associated with the adapter, 2) if an FID needs to be recovered, recovering the FID before recovering LUNs associated with the FID, and 3) recovering LUNs only if an FID and adapter associated with the LUNs are not in need of recovery, and issuing I/O requests adapters, FIDs and LUNs during recovery that are not within the scope of the exception condition.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
